

Yutic

BRAND IDENTITY · V1.0 · AUGUST 2026

We build software for problems that don't have software yet.

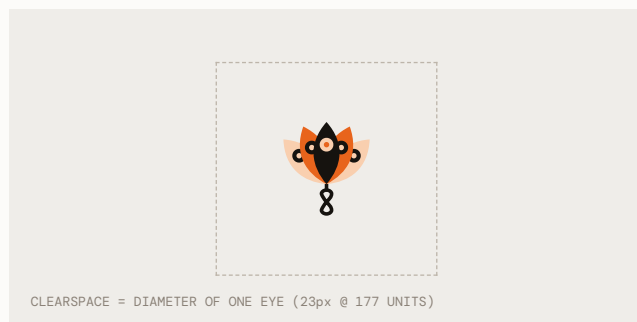

Yutic is a software lab. We pick a field — agriculture, space, biology, whatever turns out to be interesting — learn it properly, and build the tool it was missing. Normascope is the first. This document covers the mark, the palette, the type and every surface they appear on.

DOWNLOAD ASSETS ↓

01 — THE MARK

Five feathers, five eyes

A peacock display, fanned open. The eye is what a lab does — look closely at something nobody has looked at properly; five of them, because Yutic looks at more than one field. The fan is symmetrical about its centre feather and is never redrawn, reordered, recoloured outside the approved reversals, or rotated.

APPROVED COLOURWAYS

NEVER

02 — LOCKUPS

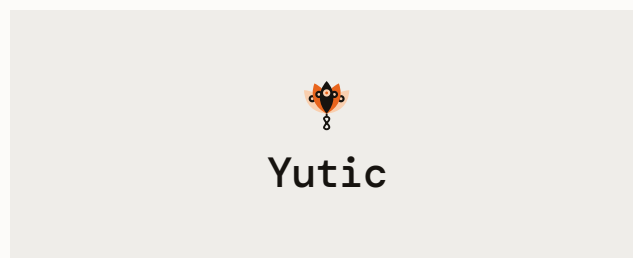

Fan left, Yutic beside it

The horizontal lockup is the default and covers almost every use. The fan sits at the wordmark's full height, aligned on the centre feather; the gap between them is one eye-width. Use the stacked lockup only where width is genuinely constrained.

ON FEATHER ORANGE

03 — COLOUR

One colour, six greys

Feather orange is the only chromatic colour in the Yutic palette. Pupil peach appears in the mark and as a highlight; everything else is a warm neutral. Orange earns attention because nothing competes with it — keep it under roughly 10% of any surface, on the one thing you want clicked or read first. Products bring their own colour; Yutic does not assign them one.

Feather

#E8641C
oklch(0.66 0.19 45)
PMS 1585 C

Shaft

#16130F
Text, mark, dark surfaces
Never pure black

Pupil

#F9CFAF
Backgrounds, highlights
Never for text

Paper

#EFEDE9
Default page ground
Warm, not white

50 · #FCFBF9

200 · #E4DFD7

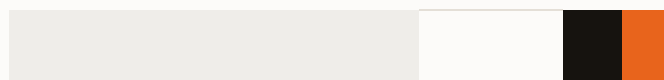

400 · #BDB5AA

500 · #8A8177

700 · #554E45

800 · #2C2620

PROPORTION

Roughly 62 paper / 22 white / 9 shaft / 7 orange. Orange is a spot colour, not a surface colour — the one exception is a card or cover printed full-bleed orange with the mark knocked out.

CONTRAST

Shaft on paper 15.9 : 1 ✓ AAA

Grey 700 on paper 7.6 : 1 ✓ AAA

Orange on paper 3.3 : 1 — large text only

Shaft on orange 7.4 : 1 ✓ AAA

04 - TYPOGRAPHY

DM Mono and DM Sans

DM Mono sets the wordmark, headlines, labels and anything numeric. DM Sans carries everything longer than three lines. Both are open licence, so they work identically in product, print and slides.

CAPTION / 13 / SANS 400	Node 18+ · no account · nothing to uninstall

05 - VOICE

Say what it does

Plain and factual. Yutic describes what it built and who it is for, and stops there. No mission language, no adjectives doing work a fact could do, no claims about changing industries.

WRITE THIS

"Normascope photographs your running app and tells you exactly what moved."

"A software lab. We pick a field, learn it properly, and build the tool it was missing."

"Free, local, no account."

NOT THIS

"Revolutionising visual quality assurance with AI-powered insight."

"We are on a mission to unlock human potential across industries."

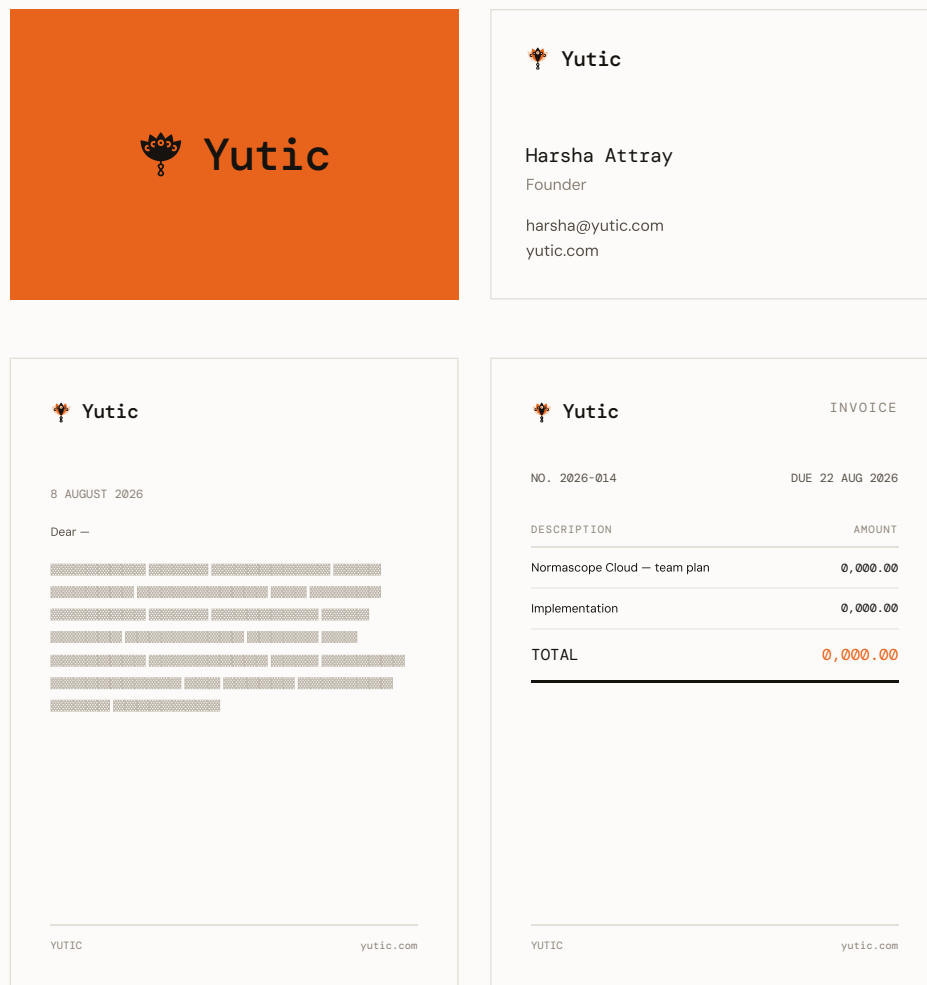

"Seamless. Effortless. Magical."

06 — STATIONERY

Card, letterhead, invoice

Card is 85 × 55 mm, uncoated stock, front in feather orange with the mark knocked out.

Letterhead and invoice are A4 with a 20 mm margin.

07 — DIGITAL

Icon, avatar, banner, signature

09 — PRODUCTS

Yutic is the quiet parent

Products keep their own identity — Normascope's peach and maroon stay exactly as they are. Yutic appears once per product surface, small, in the footer or the about page, never in the product's own header or its app UI.

ENDORSEMENT LINE

A product from  Yutic

Lockup height matches the product's footer type. Never larger than the product's own wordmark, never in feather orange when the product's palette already uses a warm hue.
